

**Bringing Railway
Testing & Commissioning
into a new era**

NeXway

FROM COMPLEXITY TO CONTROL

TESTING AND COMMISSIONING IS WHERE RAILWAY PROJECTS ARE WON OR LOST.

- Testing & Commissioning is a moment of truth before revenue service begins.
- One of the most complex because this is the point where infrastructure, systems, operations and strict safety requirements, all come together.
- Involving multiple stakeholders,
- A phase under constant schedule pressure.

MANY PROJECTS, STILL RELY ON:

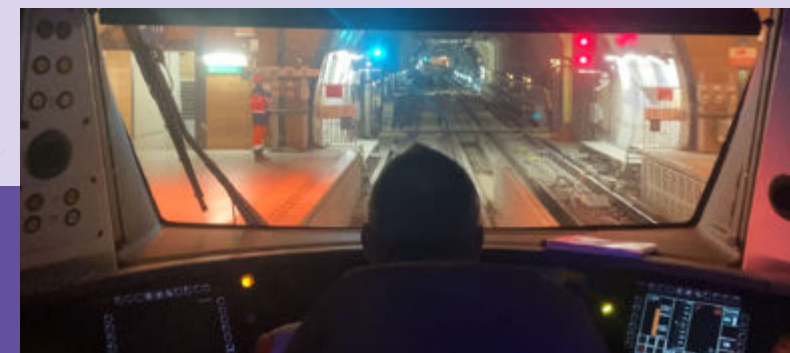

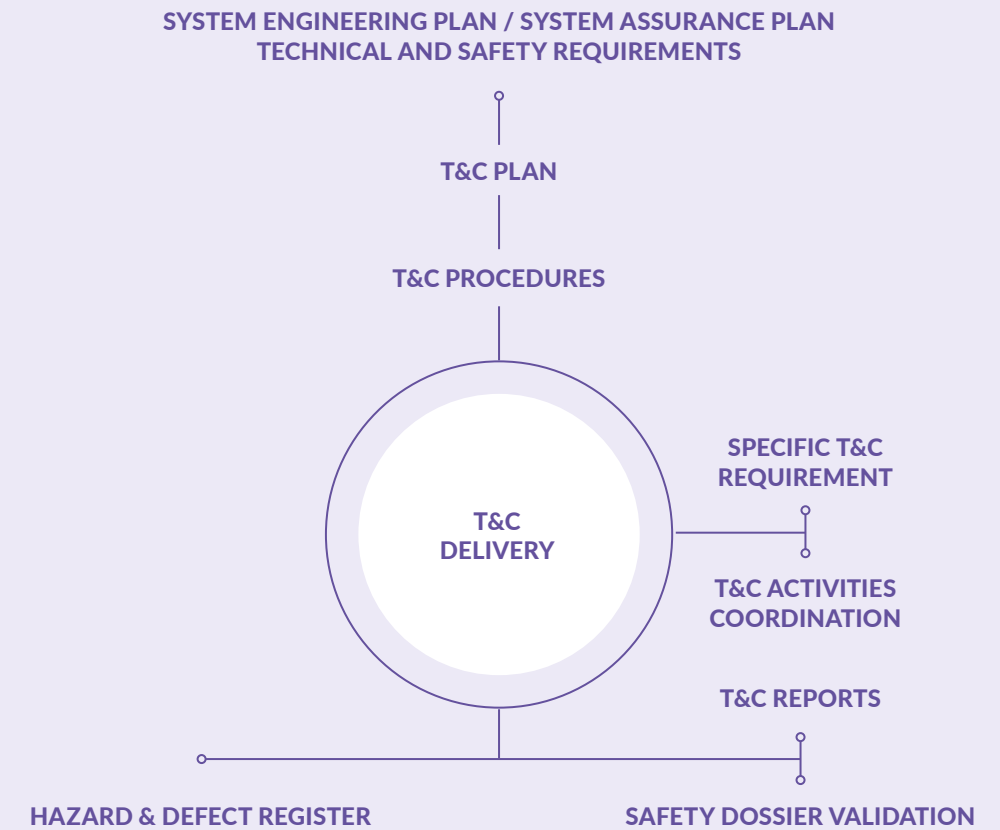

- Scattered updates
- Disconnected data sources
- Manual reporting
- Limited visibility on readiness and progress

THIS LEADS TO:

- Slower decision-making
- Delays
- Coordination gaps
- Delayed issue detection
- Higher delivery and safety risk

TESTING & COMMISSIONING, THE MOMENT OF TRUTH

OUR AMBITION: MAKE NEXWAY...

Bring clients and teams real-time visibility reactivity, safer commissioning, easier coordination through the real time monitoring and greater confidence in on-time entry into service.

APPLICABLE TO

High speed rail

Conventional rail

Urban transport

Suburban transport

... NOT JUST ANOTHER DASHBOARD

Imagine your teams are in a cockpit monitoring in real time the testing and validation status of all the systems, and taking the right decisions in the perfect timing to support safe and timely commissioning.

NeXway is a all-in-one digital solution dedicated to railway Testing and Commissioning, for railway high-speed, conventional, urban and suburban transports.

- ✓ Centralization of field information from critical railway systems such as track, catenary and signalling
- ✓ Helps teams plan tests, monitor execution, detect issues earlier and provide robust evidence for decision-making
- ✓ Support systems engineering decisions
- ✓ Identify anomalies earlier and mitigate risks
- ✓ Automate project management
- ✓ Unlock project knowledge
