

REALISTIC VISUALIZATION

WHO WE ARE

SYSTRA International Bridge Technologies offers a service through **SYSTRA IBT VIZ**, which specializes in creating high-quality 3D renderings, professional videos, and animations that allow all parties in the design process to collaborate and make decisive decisions on project development.

These visual tools permit everyone involved in the design, engineering, and construction to efficiently evaluate alternate options and design considerations to keep a smooth flow of communication.

We help our clients visualize their ideas by blending graphic technology with reality and working together to produce a design that is aesthetically unique and appealing.

OUR SERVICES

- High-quality 3D renderings
- Photorealistic imagery
- 3D modeling
- Professional photography
- Drone photography & video
- Video production
- Animation

BENEFITS

- Assist in design collaboration and project visualization.
- Communicate design intent clearly with the project team and client.
- Increase speed and efficiency of taking the project from a concept to design and construction.
- Allows initial concepts and design alternatives to be presented to and reviewed by stakeholders.
