

SYSTRA appoints Conor Cleary as Sales Director for Ireland

Conor brings extensive business development experience to help SYSTRA build on recent strong growth in Ireland and enhance its work across transport and infrastructure projects

SYSTRA has appointed Conor Cleary as Sales Director for Ireland to help the business realise its growth ambitions in the country.

Bringing a wealth of experience in business development; strong relationships with clients; and a keen insight into the construction and infrastructure sectors in Ireland, Conor is poised to lead SYSTRA into new opportunities across a range of markets, including transport, water and energy.

Conor has a degree in construction management and started his career as an engineer before moving into project management and business development. His strategic planning and operational execution have been integral to a wealth of building and engineering projects in his 20-year career, from roads and bridges to water and energy.

As part of the Business Development team at SYSTRA Limited, Conor will work closely with our market directors – Andrew Dugdale (conventional rail, highways and mass transit), Joe Botterill (high speed rail), Gareth Davies (water and environment), and James Easty (energy and defence). Together, they are leading a collaborative approach to delivering efficient, innovative, and sustainable transport and infrastructure solutions to clients across the UK and Ireland

Mike Muldoon, Business Development Director, said: “We’re delighted to have Conor join our team, bringing his substantial business development experience and commitment to supporting sustainable projects that deliver growth and opportunities for Ireland.

“Conor joins us at a crucial time for Ireland with the publication of the National Development Plan and a number of critical challenges to address around transport, infrastructure and the environment, and we look forward to working with him to help our Irish clients meet their goals.”

Conor Cleary, Sales Director for Ireland, added: “I’m excited to join the SYSTRA team here in Ireland to support the business in achieving growth and delivering for our many clients.

“The country faces significant challenges in providing sustainable transport solutions and utility infrastructure to support population growth and energy generation – SYSTRA specialists have global and local experience in these areas. I look forward to working with the local teams in Ireland and the UK as well as colleagues from across SYSTRA’s global business to deliver sustainable, innovative and effective transport and infrastructure solutions that bring benefits to all stakeholders.”

SYSTRA has offices in Dublin and Cork and is delivering for clients such as Irish Rail, the National Transport Authority, Transport Infrastructure Ireland, and local authorities. Projects include BusConnects, Luas Cork and Safe Routes to School.

About SYSTRA

SYSTRA in the UK and Ireland leads the delivery of sustainable infrastructure and environments through specialist engineering and consultancy services.

A world-leader in mobility and mass transit, we deliver planning and development consultancy, engineering design, project management, and specialist technical services, that enable the safe and efficient movement of people, goods and essential services.

With around 1,000 employees throughout the UK & Ireland, and nearly 11,000 around the world, our shared mission is to help create and connect liveable cities and neighbourhoods, bringing people together and facilitating their access to employment, healthcare, education, and leisure.
