

SYSTRA acquires Ardanuy Ingeniería, a leading Spanish engineering company

Paris/Madrid, September 29, 2025 – SYSTRA, one of the world's leading engineering and mobility consulting groups, announces the acquisition of Ardanuy Ingeniería, a Spanish company renowned for its expertise in rail systems, metro, and urban transport.

More than 350 new employees are thus joining SYSTRA teams in Spain, Portugal, and Hispanic America, as well as in India and the Baltic countries. This will enable the Group to strengthen its technical expertise in the field of transport systems and infrastructure.

Furthermore, this acquisition strengthens SYSTRA's presence in Spain, Portugal, and Hispanic America, where the Group supports numerous public and private clients on major projects such as the metros of Santiago, Bogota, Panama, Madrid, Bilbao and Barcelona; road concessions in Peru, Colombia and Chile; as well as high-speed projects in Portugal and Spain. This growth momentum was recently illustrated by the successful integration of the Spanish company Subterra, acquired in March 2023, which specialises in tunnels and underground structures.

Jean-Charles Vollery, CEO of the SYSTRA Group, stated:

"We are very pleased to welcome the teams from Ardanuy Ingeniería, with whom we share the same vision and passion for engineering. This combination will enable us to deliver even greater value to our clients and to jointly take on ambitious projects. I am convinced that this alliance will offer our teams real opportunities for success and growth."

Carlos Alonso, CEO of Ardanuy Ingeniería, explained:

"Joining the SYSTRA Group makes perfect sense for our company: we share the same passion for technical excellence, with expertise that is both closely aligned and highly complementary. We are building an organisation with a clear vision for the future, capable of offering new development perspectives for our teams and creating synergies for the benefit of our clients across all the regions in which we operate."

With this acquisition, SYSTRA continues its commitment alongside public and private stakeholders to design, develop, and deliver high-performance, sustainable transport infrastructure, supporting the transformation of regions and communities' mobility.

About SYSTRA

SYSTRA is one of the world's leading engineering and consultancy groups specialising in public transport and mobility solutions. For more than 65 years, the Group has been committed to helping cities and regions to contribute to their development by creating, improving and modernising their transport infrastructure. With 11,000 employees, the Group's mission is to connect people and bring territories closer together in the 80 countries where it operates. By making travel more fluid, the infrastructures designed by SYSTRA bring communities together, develop social integration and facilitate access to employment, education and leisure. A signature for transport solutions, SYSTRA supports its partners and clients throughout the lifecycle of their projects. SYSTRA is involved at a very early stage in the design phase, right through to the deployment and maintenance test phases. SYSTRA provides all of its services in more than 80 countries worldwide and generates 80% of its turnover internationally.
